

Brain Teaser

Day 6

Make a new python file in your directory, called **basics.py**

Complete the following 3 challenges in basics.py! For each one you finish, put a check in the box next to it.

1	Have the computer display the string: "Hello World!"	<input type="checkbox"/>
2	Create two variables with any value you want	<input type="checkbox"/>
3	Add the values of the two variables you just created	<input type="checkbox"/>

Who is considered the first computer programmer?

- a. George Boolean
